

FOR IMMEDIATE RELEASE

## DELTA GROUP ELECTRONICS ACHIEVES ISO 13485 CERTIFICATION

ALBUQUERQUE, N.M. March 30, 2009 – Delta Group Electronics, Inc., a leading electronics manufacturing services (EMS) company, today announced that its San Diego-based California division has received ISO 13485 certification for medical product assembly. The addition of this medical assembly standard complements the division’s existing quality system that was previously certified to the ISO 9001: 2000 and AS9100 levels.

“We are delighted to have received our ISO 13485 certification as it clearly demonstrates the commitment of Delta Group Electronics to providing our customers in the medical products industry with high quality service while maintaining strict medical manufacturing standards,” said Bill West, General Manager of Delta Group’s California Division.

ISO 13485:2003 is an ISO standard that specifies the requirements for the quality management systems of an organization engaged in the manufacture of medical devices or related services. Based on the ISO 9001 international quality standard, ISO 13485 requires additional controls to address the safety and regulatory requirements of medical devices and related services.

Founded in 1987, Delta Group Electronics, Inc. is a full-service Electronic Manufacturing Services (EMS) company offering turnkey services for its customers in the aerospace, defense and commercial industries. Based in Albuquerque, New Mexico, the Company also has assembly operations in San Diego and Dallas, as well as Rockledge, Florida and Fayetteville, Arkansas, with administrative offices in St. Louis. It maintains an ISO9001: 2000 quality certification at each of its facilities, along with the upgraded AS9100 quality standard at its San Diego operations.
